Quality Policy Statement

Vyrian is committed to an operating philosophy based on openness in communication, integrity in serving our customers, fairness and concern for our employees and responsibility to the communities within which we operate. Our vision is to exceed customer expectations for quality, safety, sustainability, cost, delivery and value. Additionally, we are dedicated to creating a profitable business culture that is based on the following principles:

OUR PEOPLE

Vyrian committed to equality in employment opportunity and rewards, embracing wholeheartedly the cultural diversity within the communities we call home. Our employees' welfare and interests are foremost throughout all aspects of our business and how we conduct our affairs.

OUR CUSTOMERS

Customer needs are paramount and represent the highest priority within our business. Our obligation is to proactively seek out and define customer needs while addressing all requests expeditiously without creating false, or unreasonable expectations. It is Vyrian's policy to establish and work with processes which ensure that we understand our customers' needs and that we produce, deliver and support our products and services to satisfy those needs better than our best competitor. Measured levels of customer satisfaction demonstrate our progress towards this goal.

OUR COMMUNITY

Vyrian is committed to supporting the community where we operate. We believe in the practice of social responsibility and encourage similar behavior in our employees and suppliers. We proactively comply with all applicable safety, environmental, legal and regulatory requirements to which we subscribe.

OUR QUALITY

Beginning with a clear definition of customers' expectations, we strive to consistently meet or exceed them. We adhere to all applicable standards and customer-specific requirements and endeavor to provide processes that ensure we achieve this in order to build a robust business.

Vyrian processes are defined in the Quality Management System (QMS), which is designed to satisfy all customers, regulatory and legal requirements. Vyrian departments are expected to operate by the system and achieve compliance to AS9120, AS6081, ANSI/ESD 20.20 and other standards deemed appropriate to their processes and customers' needs. These departments are expected to carry out self-assessments as the basis for planning improvement.

To maintain the quality of all internal functions and processes, Vyrian documents the relevant system elements for each function and process owner, and it is the responsibility of department managers to ensure that their employees know, use and comply with these system elements. The QMS establishes a framework to facilitate the formation and review of quality objectives through management reviews, audits, and feedback from customers and employees.

Vyrian is committed to continual quality improvement, meeting our customers' requirements and continually improving the effectiveness of the quality management system through compliance with our Quality Management System.

All personnel who impact quality are required to familiarize themselves with appropriate documentation and implement the policies and procedures in their work. Vyrian's Management is committed to compliance with applicable industry standards and best practices.

The quality policy is communicated to employees to enhance their understanding of how they impact the company's quality management system. Employees at every level have a responsibility for the quality we offer our customers. Employees are empowered to participate in the continual improvement of the quality management system to maintain its effectiveness. This policy is reviewed for continuing suitability.
